APPLICATION & STRUCTURE DIAGRAM

● STANDALONE & NETWORKING ACCESS CONTROL

Basic Access: the most basic access, exiting venue is only by pressing a push button

Anti Passback: restrict user to re-enter before exiting venue or increase security level by having access reader at the other side of the door. Both entering and exiting will required swipe card or keyfob for access.

Networking: beside configuration through Wiegand Keyboard and Master Card, you can also link AR-101-H with Soyal converter to PC for configuration via SOYAL Software or for anti-cloning and encryption process.

● DUAL FREQUENCY & OUTPUT INTERFACE MINI READER

Not only compatible with both 125kHz and 13.56MHz frequency to read EM, Mifare, and Desfire tags, AR-101-U works with Wiegand and RS485 interface that compatible with SOYAL Access Controller Series and Multi-Door Control Panel for more flexibility and multi functions.

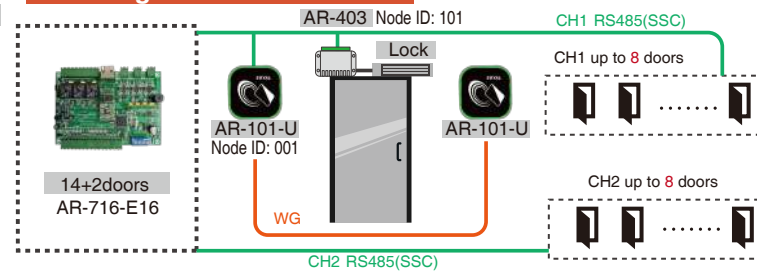

Wiegand Mode

Can be connected to single or dual doors controller

Can be connected to WG port on Multi-door control panel

Working under RS485 Mode

● MAILBOX / STORAGE

access your own mailbox or storage without traditional key, but with card, tags, or even your cellphone supported NFC.

Membership Storage System

Each AR-101-H installed on the storage can only give access to vacant storage.

Suitable for **public space**: Storage rental or membership storage at fitness center and library.

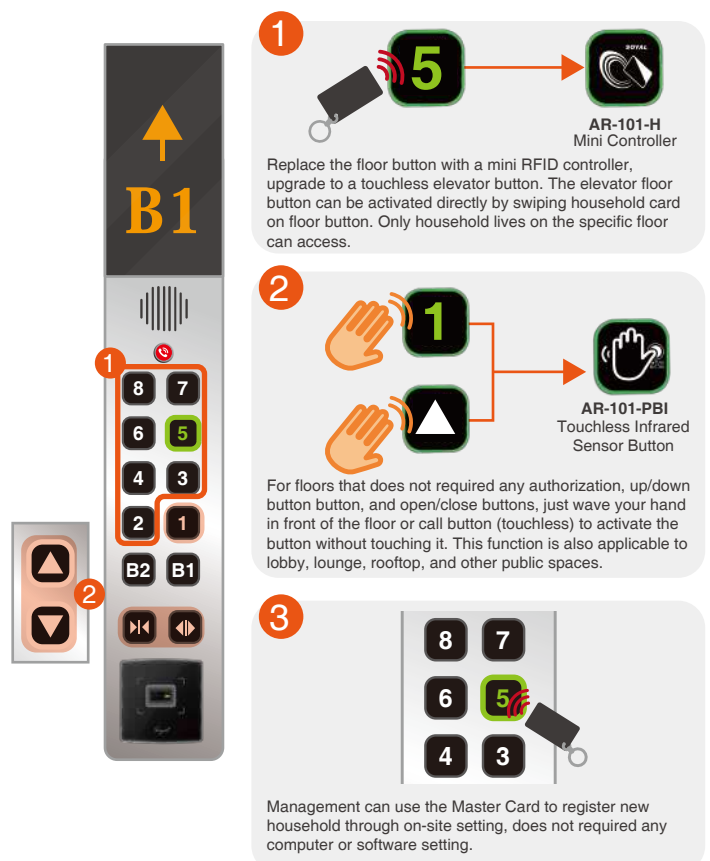

One Person One Storage

Each AR-101-H installed on the mailbox/storage can only read configured valid card for each controller.

Suitable for **private space**: Apartment building, campus locker, and office storage.

FAQ

Q: How to configure and add or delete user on keyless editing?

A:

- Under standalone mode, configuration and add or delete user can be done with Wiegand Keyboard by sending command to controller. Or you can also set up to three master cards for each controller to quickly add and delete users.
- For networking, [Node737](#) Software provide easy setting for keyless controller or you can also choose [701Client](#) for more detailed setting and [Commview](#) by sending protocol command. All Soyal software are available for downloading on Soyal website.

Q: What is the difference between SOYAL Home Series and Enterprise Series Controller?

A: SOYAL access controller classified into two categories in term of specification; Home Series and Enterprise Series. SOYAL Home Series controller has already include all basic standalone and networking access controller that you need. But E series controller provide what Home Series controller has already have, and more advanced features like built in more user capacity, UART Port for extension module, and extension interface like Ethernet and POE.
